

Fisher™ 585C Piston Actuators

The 585C linear piston actuator is a powerful, double-acting actuator that provides accurate throttling or on-off operation for sliding-stem control valves.

The 585C piston actuator family is available in sizes 25 to 130 to cover a wide range of thrust and travel length requirements. It can be used with switching valves for on-off control, or with the DVC6200 digital valve controller or 3600 positioner for throttling applications.

The 585C has a wide-range of supply pressure capabilities, up to 150 psig. As the 585C is double-acting, the positioner supplies air to both sides of the piston, resulting in stiff, precise movement and control.

Information for the 585CLS long stroke actuator can be found in Fisher bulletin 61.2:585CLS (D103792X012).

X0175-1

**Fisher 585C Piston Actuator
with FIELDVUE™ DVC6200 Digital Valve Controller**

Features

- **High Thrust Capability**-- With standard air supply, the Size 130 Fisher 585C can produce up to 111,000 Newtons (25,000 lbs) of force.
- **Wide Range of Sizes**-- The 585C family of actuators offers a wide range of sizes, with piston areas of 168 sq cm (26 sq in) up to 1,429 sq cm (221.5 sq in).
- **Rugged Construction**-- The 585C standard yoke material is ductile iron, resulting in robust construction and increased thrust capability.
- **Broad Travel Capability**-- 585C piston actuators provide standard travel lengths of up to 203 mm (8 inches).
- **High-Performance Instrumentation**-- 585C actuators are available with a variety of positioners and accessories, including the FIELDVUE DVC6200 digital valve controller. The 377 trip valve and tank system are also available for fail-safe action.

Specifications

Operating Pressure⁽¹⁾

Sizes 25-50:

Maximum Allowable: 10.3 bar (150 psig)

Minimum Recommended: 1.4 bar (20 psig)

Sizes 60-130:

Maximum Allowable: See table 8.

Minimum Recommended: 2.4 bar (35 psig)

Travel

See table 2

Thrust Capabilities

See tables 4, 5, 6, 7, and 8

Stroking Speeds

Varies with actuator size, actuator spring, travel, and supply pressure. If stroking speed is critical, consult your [Emerson sales office](#) or Local Business Partner

Piston Area

See table 8

Cylinder Volumetric Displacement

See table 2

Operative Temperature Limits⁽¹⁾

For All Sizes:

With Nitrile O-Rings: -40 to 80°C (-40 to 175°F), standard

With Fluorocarbon O-Rings: -18 to 149°C (0 to 300°F), optional

Yoke Boss and Valve Stem Diameters

See table 3

Pressure Connections

Sizes 25 and 60:

■ 1/4 NPT internal (standard), or ■ 3/8 NPT internal (optional)

Size 50:

■ 1/4 NPT internal (standard), or ■ 1/2 NPT internal (optional)

Sizes 68-130:

■ 1/2 NPT internal (standard)

Dimensions

See figures 6 and 7

Construction Materials

Part	Material
Yoke	Ductile Iron
Piston	Aluminum
Cylinder	Aluminum
Bolting and Fasteners	NCF (non-corroding finish)
Springs (sizes 25 & 50 only)	Alloy Steel
O-Rings	Nitrile (std), Fluorocarbon, or EPDM
Actuator Stem	Chrome-plated Steel
Stem Connection	Stainless Steel
Travel Indicator Scale	Stainless Steel
Paint	Polyester Powder
Actuator Stem (sizes 60-130 only)	S41600 (416) SST, Chrome Plate
Cylinder Seal Bushings (sizes 60-130 only)	Brass

Instrument Mounting

Universal NAMUR mounting

Approximate Weights (less positioner and handwheel)

Size 25:

2-1/8 inch yoke boss, 7 kg (16 pounds)

2-13/16 inch yoke boss, 8 kg (17 pounds)

Size 50:

2-13/16 inch yoke boss, 20 kg (45 pounds)

3-9/16 inch yoke boss, 22 kg (48 pounds)

Size 60: 31 kg (68 pounds)

Size 68: 54 kg (120 pounds)

Size 80: 102 kg (225 pounds)

Size 100: 113 kg (250 pounds)

Size 130: 188 kg (415 pounds)

Options

Sizes 25 and 50:

■ Top-mounted handwheel, see figures 6 and 7 and table 9

■ Cylinder bypass valve ■ Limit switches ■ Fisher 4200 position transmitter

Sizes 60-130:

■ Integral side-mounted handwheel

Sizes 25-130:

■ FIELDVUE mounting options

■ Fisher 377 trip valve system to fail actuator

■ Up or ■ down or ■ lock in last position

■ TopWorx DXP M21GNEB electrical valve stem position switch

■ Micro-Switch limit switches

1. The pressure/temperature limits in this bulletin and any applicable standard or code limitation for valve should not be exceeded.

Features and Advantages

Table 1. Features and Advantages

Features	Advantages
High thrust capability	With air supply capability of up to 150 psig, the 585C can produce up to 111,000 Newtons (25,000 pounds) thrust to overcome high valve unbalance.
Stroke Length Capability	Depending on size, strokes of up to 203 mm (8 inches) are available.
Wide range of sizes	The 585C is available in standard sizes 25, 50, 60, 68, 80, 100, and 130.
Valve mounting capability	Depending on size, the 585C can be mounted to yoke boss diameters of 2-1/8 inches through 5-inches, and valve stem diameters of up to 1-1/4 inch.
Positioner mounting capability	Universal NAMUR mounting provides a consistent mounting method for all sizes. This mounting capability provides vibration resistance per ISA-S75.13.
High frequency response	The double acting construction allows quick response to instrument signals.
Stiff construction	Pressure on both sides of the piston, plus the relatively small volume of air within the cylinder, results in stiff, precise positioning.
Handwheels	585C size 25 and 50 actuators are available with a top-mounted handwheel. All other 585C actuator sizes can accommodate a side-mounted handwheel.
Bias springs	The sizes 25 and 50 are available with bias springs. A bias spring under the piston fully retracts the actuator stem upon loss of supply air, while a bias spring on top of the piston fully extends the actuator stem. The spring bias mode is easily reversed without the need for additional parts.

Figure 2. Fisher 585C Piston Actuator Without Springs

E0409

Principle of Operation

The 585C piston actuator (figures 1 and 2) uses a piston that moves inside the actuator cylinder. An O-ring (see figure 1) provides a seal between the piston and the cylinder.

From an equilibrium state, the actuator reacts to a force unbalance that is created by increasing supply pressure on one side of the piston, and decreasing it on the other. This moves the piston up or down, and results in a repositioning of the valve control element.

Figure 3. Fisher 585C Piston Actuator with Handwheel

E0410

Figure 4. Fisher 585C Piston Actuator with Spring Return

W7447-1

Actuator with Handwheel (figures 3 and 6)

The handwheel version can be used to open or close the valve manually (either during normal operation or in an emergency), to position the valve at any point in the stroke, or to act as a travel stop.

Size 25 and 50 actuators use an integral top-mounted handwheel. See figure 6.

Size 60 to 130 actuators use a side-mounted handwheel, and come with a spring-loaded ball detent which prevents vibration from changing the handwheel setting. Handwheels for most types are either 203 mm (8 inches) in diameter with beveled gears or 432 mm (17 inches) in diameter with worm gears.

Actuator with Spring Return (figure 4)

585C size 25 & 50 actuators are available with bias springs. The 585C actuator with bias spring has the spring under the piston and fully retracts the actuator stem upon loss of cylinder pressure. The bias spring in the 585CR actuator is on top of the piston and fully extends the actuator stem upon loss of cylinder pressure. No additional parts are required to convert from one actuator type to the other.

Instrument and Accessory Selection

An excellent selection of sensitive and accurate instruments and accessories is available for 585C piston actuators. These include FIELDVUE DVC6200 digital valve controllers, 3600 pneumatic (P/P) and electro-pneumatic (I/P) positioners, TopWorx™ DXP M21GNEB electrical valve stem position switch, 377 trip valve, 4200 electronic position transmitter, and limit switches. They are described in separate publications. Contact your [Emerson sales office](#) or Local Business Partner for details.

normal installation is with the actuator vertical above the valve. Actuator and positioner dimensions are shown in figures 6, 7, and 8.

If the supply source is capable of exceeding the maximum actuator operating pressure or instrument supply pressure, appropriate steps must be taken during installation to protect the instrument and all connected equipment against overpressure.

Installation

The actuator may be installed in any orientation but

Actuator Data

X indicates where the listed supply pressure will exceed the maximum thrust allowable.
1. The maximum design pressure for size 25 through 100 actuators is 10.3 bar (150 psig). Size 68 and 130 actuators are limited to 9.7 and 7.8 bar (140 and 113 psig) respectively.
2. The size 25 and 50 data is for the construction without a bias spring.
3. Minimum operating pressure for sizes 60-130 actuators is 2.4 bar (35 psig).
4. The size 68 actuator with a handwheel is limited to 40000 Newtons (9000 lb) thrust.

1. The C dimension shown is for FIELDVUE DVC6200 digital valve controllers. Add 38.1 mm (1.5 inches) to this dimension for 3620JP positioners.
Subtract 12.7 mm (0.5 inches) from this dimension for 3610JP positioners.
2. Actuator removal clearance.

Figure 8. Fisher 585C Dimensions—Size 60 to 130 Actuator (also see table 12)

1 The C dimension listed in the table is for the actuator with the FIELDVUE digital valve controller. Add to this dimension for 3620JP positioners. Subtract from this dimension for 3610JP positioners. Refer to the footnote in the table.
